Good morning,

The language I found on the 1, 2, 3 strikes you're out was in the last version that Randy did. But it only had it for two strikes and it was contained in Section VI.C. Additional requirements - any pipeline carrying "Treated produced water", see below:

3. Any second leak or spill within the same authorization will require operations to be shut-down until the operator discusses the matter with BLM.

**Would you like me to incorporate this language into current document?**

Sincerely,

Yolanda,

Thank you for looking into the language of the document. This is not the language that I had in mind. I think the current language we have will be fine and I will look in my old e-mails documents for Language I had in mind. Thank you for looking into it.

Good morning!

Sorry, I couldn't remember if you wanted me to include this in the policy or not? I can add it to the Non-Compliance section on the last page. Since the ranchers wanted to know what trespass really meant to a company, I don't think it would hurt anything to add it.

**Thoughts?**
